~~Apparatus (An article, a method implemented with a machine, the a machine, and the a~~  
method for making the a machine, and products produced thereby). ~~The, with respect to a~~  
computer system can, for example, be structured (e.g., including programmed) to carry out the  
steps of: calculating an insurance reserve requirement from data; segmenting, for the reserve  
requirement, an insured contingency risk from a corresponding capital requirement to produce  
components; and carrying out the reinsurance transaction by steps including: allocating the  
components to different parties, one of the parties from a group including an insurance risk carrier  
and a source of an asset for said the capital requirement; and assigning assets for the reserve  
requirement to a reinsurance asset trust to receive reinsurance credit for said the reserve  
requirement.
